HOLIDAY MAKEUP

1-2-3

Dashing off to a glam event this season? Flaunt a festive, flawless face with these tips from makeup guru François Nars, creator of Nars Cosmetics. "Go for shimmery color or try a dramatic look," he says. "Makeup is an incredible accessory—have fun with it!"

FOR EYES: Opt for shimmery shades and don't be afraid to go with of-the-moment dark metallics. With ink-black hues tinged by gunmetal and pearlescent shimmer, the **Arabian Nights Trio Eyeshadow** will create a mysterious, smoldering look.

FOR LIPS: Red is always classic, and this winter you can update the look with a formula that balances both luminous and matte.

FOR SKIN: Play up your natural skin tone with blushes (preferably creams) that add a warm, sexy glow.

Glam Hair Tricks

'Tis the season for party hair! Here: some smart styling tips from the FHI Heat KORE team.

- "The best updos mix-up different textures," says John Bertorelli, the Team's North American Artistic Director. "First, pull one side back, twist it and secure it up. Then use flat irons and curling irons to add straight and curly texture throughout, pinning up pieces as you like."
- For a polished, high-glam effect, sweep all your hair to one side, then redefine the ends by bumping them under with a large-barrel curling iron.
- If you want loose, sexy curls, take hair from an inch off the root and wrap it around a flat iron with beveled edges all the way to the ends. Hair that's wrapped last will have the loosest wave. HAIR BY ROYSTON BLYTHE FOR BATISTE DRY SHAMPOO. PHOTO BY BAZA COOK. MAKEUP BY SALINA THIND.

WINTER HAIR HELPERS

During the winter, your hair has special needs. Nicholas Penna, Jr., owner and lead stylist at SalonCapri in Newton and Dedham, MA, has the 411 on how to keep your locks looking their best.

• Pick up a moisture rich shampoo and conditioner for the winter months, preferably one with vitamins and oils. Nick recommends L'Oréal Professionnel's Serie Expert Liss Ultime shampoo and conditioner.

• Use Argan oil, which contains fatty acids, Vitamin E and antioxidants that restore your hair's natural luster without a greasy shine. "Use about a dime sized amount and comb it evenly through damp hair."

• When blow-drying, always use a thermal spray or serum to protect hair. Also, be sure to go all the way. "Blow-drying hair halfway will only create frizz and damage. Spending the extra 5 minutes blow-drying hair to a smooth finish makes all the difference."

• "Never go outside with wet hair," warns Penna. Wet or even damp hair can easily freeze once temperatures drop into the 30s, and frozen strands mean split ends.
