HOT MOTHER EARTH

green beauty

Even our faces have gone green with **natural beauty products** that are good for the planet and for our bodies. They're made without harsh chemicals and artificial fragrances, so you might think these products don't pack the same punch as their mainstream counterparts. But natural ingredients such as organic jojoba and argan oil mean you don't have to sacrifice good looks for good karma. Some local options include **GRN**, a new line of skin products from **Exhale Spa and Salon** (28 Arlington Street, Boston, 617.532.7000); the basic **eco-friendly manicure** (\$17) at **SalonCapri** (31 Lincoln Street, Newton, 617.969.1970); and Massachusetts-based **Suki Color Natural Makeup**, available at **Whole Foods** (181 Cambridge Street, Boston, 617.723.0004) or at www.sukicolor.com.
